What makes Vampires so Cool?

Whether they exist or not, is a different debate all together. But as of now, let's talk about the vampires which films, stories and literature have managed to create in our minds. It's been a long time that mankind has witnessed several movies and novels that are about vampires.

Despite of being violent, cruel and scary; vampires manage to keep us excited and amazed about their personalities. If you are considering the most obvious factors like blood, immortality, power, invisibility or healing ability to be responsible for the

vamp-sensation; it's just a part of it. These might definitely be the qualities which we would desire in ourselves but, such is the case with any super power.

Here are the three main reasons that give vampires, a special place in our hearts and minds...

The Beauty Factor

Yes! The first on the list is beauty. Somehow, vampires have always been projected as the most beautiful and handsome creatures in at least some phase of their routine. Although they after all become horrible looking creatures or simply fly away as bats; in their 'normal' form they are almost gods and goddesses of beauty. Flawlessly fair skin, no pimples, sexy figure, and perfect body curves, smooth and silky hair! What else can one possibly need to impress the opposite sex? This directly hits one of the most elemental basic instincts of life, the sex appeal. Now you might have figured out, why most of the vampire movies have sexy posters.

The Bite Factor

Again, vampires manage to attack one of the most attractive portions of human body-the neck! This not only makes the blood sucking 'event' interesting to watch, but also sensuous enough. This is also one of the reasons, why vampires have to get pretty intimate to their targets before the 'attack'; which further adds-up to the excitement in our minds.

Still Human!

Indeed; the most important reason that gives vampires that 'special spot' is nothing but the fact that they are still humans! Despite all the powers and privileges that the vampires enjoy, they still manage to have the basic human form intact. This gives a strange sense of confidence as well as affinity for vampires. Without necessarily turning into all-time hideous monsters; vampires manage to become even more appealing after 'the conversion'!
