### **LASER FACIALS**

Laser, unlike commonly perceived, isn't merely a tool of aggressive treatments. With the combined effects of accuracy and focused targeting, lasers also can be an effective instrument of getting facial treatments.

Healing and surfacing several imperfections of skin, laser facials can help bring resolution of deep rooted and superficial issues. At Aura Cosmetic Centre, we specialize in bringing about targeted results.

Generally, the outcomes of laser facials are much more controlled, precise and predictable as compared to chemical peels or microdermabrasion. Primarily bifurcated into two main segments, laser facials can be ablative and non-ablative. Based on skin type and problem, the skin expert might suggest milder non-ablative or relatively more intense ablative laser treatment.

Depending skin type and problems, one might require 3-5 treatments which are usually spaced a month apart.

### **LASER FOR ACNE & SCAR TREATMENT**

Acne and accidental scars can leave a bad and unappealing impression on others, in both professional as well as personal lives. In the competitive times taking risks or compromising on the looks and appearance isn't really considered a matter of personal choice. Selection, recruitments, marriage match-making and other social interactions, widely depend on the visual appeal and personal confidence.

Lasers have been very effective in external application-free treatment of acne and scars. Because of its optical nature and controlled efficacy, almost all types of acne and scars can be minimized or eliminated.

At Aura Cosmetic Centre, our experts possess a rich experience of handling various types of scars and acne, with the strategic treatment process.

### **MEDICATED FACIALS**

An effective alternative against laser or traditional chemical peeling, medicated facials have emerged as a very popular option for facial treatments and prevention of future breakouts.

Medicated Facials are essentially the techniques that rely on skin cleansing and purification, based on medicated chemical applications for deep action.

Aura Cosmetic Centre's skin experts effectively treat acne prone or any problematic skin type with unique medicated formula applications which have deep penetration and accurate results.

Medicated facial applications, are enough light in weight, to not bother your experience as an excess burden.

Cleansing followed by extractions ensure effective results with existing skin issues and prevention against future breakout activity by removing dead skin cells and reducing the sebum that can clog follicles.
